

CONCENTRATED ANTIMICROBIAL COMPOSITIONS AND METHODS

ABSTRACT OF THE DISCLOSURE

5 The present invention is generally related to a product and process to reduce the microbial contamination on organic matter, such as processed meat, fruits and vegetables, plant parts, and inanimate surfaces such as textiles and stainless steel. In particular, the invention is related to a product and process to disinfect meat products and other substrates using a concentrated antimicrobial composition containing a fatty acid ester, an enhancer and optionally a surfactant.
